Description

2026 Variant 2700kg Plant & Machinery Trailer

Move the machine. Get back to work.

1,927 kg of payload on a platform designed for earthmoving and construction equipment. The loading height, deck width, and ramp configuration are built around what you are actually putting on it.

Low loading height. Rear ramp loading.

Most compact machinery rolls on without a loading dock. The rear ramp drops, your machine drives on. Gas struts hold the ramp in position. Fast, predictable, doable solo.

Mechanical overrun brakes — self-regulating, no controller required.

Hot-dip galvanised. Parabolic leaf spring suspension. LED lighting.

Galvanised throughout for job site use and all-weather storage. Suspension absorbs rough site access roads.

Danish-designed. RVSA 2023 compliant. Ready to register.
