Description

2026 Variant Flattop Pro-Line 3521 P3
Professional payload. Professional build.

2,915 kg in an aluminium-floored box — enough for a full pallet, a skip worth of material, or the kind of mixed load that fills a proper working trailer. The model that hire companies, landscaping fleets, and civil contractors come back to because it holds up under constant use.

Parabolic leaf spring suspension. Mechanical overrun brakes — self-regulating, no controller required.

Aluminium floor. Hot-dip galvanised chassis and sides.
Heavy-duty steel sides that take the abuse of constant loading and unloading. This trailer will look like a working trailer in ten years — not a written-off one.

Danish-designed. RVSA 2023 compliant. Ready to register.
