Description

Mulcher with swinging hammers rotor for excavators having a weight between 6 and 13 t. Designed for underbrush, grass and bushes. It comes equipped with a variable displacement hydraulic piston motor. The optional stronger bearing for the back roller ensures best performance and maximum reliability when working on uneven terrain. The flow control valve allows easy mounting to the excavator without the need to adjust the flow (the valve will work automatically depending on the excavator). It can be equipped with flails or hammers for different types of applications. The standard equipment includes: -enclosed machine body -belt transmission -32/65cc variable manual displacement hydraulic piston motor with relief and anticavitation valve -flow control valve -hood with mechanical adjustment -adjustable skids -welded counter blade -rear roller -possibillity to have the rotor equipped with PML hammers or Y-flails Available on demand: customized attachment bracket, attachment plate with self leveling device, stronger bearing for back roller, mutiple flail options. DWL Machinery is a liquidation and clearance company who sell direct to the public.
