Description

BRAND NEW FAE SOIL STABILIZERS FOR 300-500 HP STABI/FRS STABI/H NATION WIDE & INTERNATIONAL DELIVERY LIKE OUR PAGE FOR ALL NEW LISTINGS: @dwlmachinery Ph: Andrew 0401 873 538 or 1300 DIAL DWL -Finance is available on all of our equipment _____ DWL Machinery is a liquidation and clearance company who sell direct to the public. Most of our plant and machinery comes direct from Government departments, the Australia Defence Force, local councils, fleet & leasing companies, bank & finance matters We are a bucket and attachment dealer for excavators and skid steers including your favourite brands like FAE, Digga, Norm engineering, Sureweld, Auger Torque and ABS. _____ How to find the soil stabilizer thats right for you Are you looking for a soil stabilizer driven by a PTO agricultural tractor, to achieve high output at a construction site, that can also be driven on roads eaiser than a self-propelled vehicle could? FAE has 4 fixed-chamber soil stabilizer models in the STABI/FRS and STABI/FRS/HP series and an additional 4 variable geometry chamber models in the STABI/H and STABI/H/HP series. Are you looking for a fixed-chamber soil stabilizer that is highly efficient, productive, and extremely reliable? The STABI/FRS and STABI/FRS/HP series are right for you going up to 50 cm deep. A protruding rotor and spacious mixing chamber facilitate deep soil stabilization and minimize power absorption for excellent mixing quality. Do you need a soil stabilizer with a variable geometry chamber that guarantees maximum performance? FAE recommends the STABI/H and STABI/H/HP series with variable geometry mixing chamber and special rotor for extremely precise work even up to 56 cm. The variable geometry chamber is an FAE technology solution that is unique in the sector. This technology has two important benefits. First, it allows the machine to penetrate the soil with just the rotor because of the moving frame that can be hydraulically adjusted with extreme precision from the tractor cabin. Second, the mixing chamber's volume is variable. As the depth increases, the chamber's volume also increases, and so does the ability to manage the material being mixed. How much does an FAE soil stabilizer cost? FAE soil stabilizers cost less than similar self-propelled vehicles designed to do the same type of work and are easier to move from one site to another. Thats why, in many cases, an FAE soil stabilizer is the best choice. Contact us. Applications for FAE soil stabilizers FAE soil stabilizers are designed specifically to prepare the ground for building roads, highways, railroads, parking lots, sports complexes, office parks, industrial plants, and other infrastructure with a single pass. Up to the task when paired with powerful tractors up to 500 hp, they are easy to move from one site to another. Please see link below for more info and specs https://www.fae-group.com/en_AU/products/construction/co-pto-driven-heads/soil-stabilizers-for-tractors _____ We are a bucket and attachment dealer for excavators and skid steers including your favourite brands like FAE, Digga, Norm engineering, Sureweld, Brian James Trailers, Auger Torque and ABS. - Accepted payment methods: Internet transfer, cheque, cash, Paypal or credit card.
