Description

Soil stabilizer-Stone crusher-Asphalt shredder with a max working depth of 50 cm/20, with variable displacement chamber for tractors between 300 and 500 HP. The flagship of the multipurpose road construction attachments turns 10-year-old and for the special occasion FAE introduces the HP (high power) version designed and built for tractors up to 500 HP. this machine is able to crush rocks, grind asphalt and do soil stabilization as well as milling slabs with a working depth up to 50 cm (20). When designing this unit, special attention was given to the development of the variable displacement crushing chamber. Two special piston-cylinders allow a perfect synchronization of the rotor when penetrating the soil. the crushing chamber bolt-on protections and the adjustable counter blade will guarantee the highest performance in the crushing process.
